

Digital Accelerator program

In the Digital Accelerator program, I aim to:

- 1. Master Automation:** Learn to create bots for efficient workflow automation.
- 2. Embrace Machine Learning:** Acquire skills in data analysis, predictive modeling, and machine learning algorithms.
- 3. Excel in PowerBI:** Develop proficiency in data visualization for clear and compelling presentations.
- 4. Apply Design Thinking:** Utilize design thinking for user-centric problem-solving.
- 5. Hone Digital Storytelling:** Learn to communicate insights effectively through digital storytelling.
- 6. Cultivate an Innovation Mindset:** Foster creativity and forward-thinking for continuous improvement.

My goal is to contribute to current efficiency and be equipped for future innovation in our business services and beyond. I am excited to start the PowerBI journey and make a meaningful impact!
